

Summary

I am a full-stack web developer with experience in Ruby, Rails, SQL database management, React, Redux, and other JavaScript libraries. I am currently working as a front-end engineer for Dish Network where I have spent time on multiple teams using Angular and React to implement solutions for internal sales agents and external clients. I am currently working on Dish's Sling TV application, developing new features including the critically-acclaimed 'NBA League Pass' and 'NBA Team Pass.'

Projects

BuchaBuddy (Web Application) - <http://www.buchabuddy.com>

An inventory tracking application for kombucha homebrewers

- After getting into homebrewing kombucha, I wanted the ability to track all of my ingredients, recipes, capital, etc. BuchaBuddy is an open-source web application that helps homebrewers like me make the best kombucha.
 - Tech stack: Ruby, Rails, Angular, Redux, TypeScript, PostgreSQL, Capistrano
- GitHub: <https://github.com/buchabuddy/buchabuddy>

Passr (Ruby Gem) - <https://rubygems.org/gems/passr>

A simple gem handling password generation, encryption and decryption.

- I created this open-source, lightweight gem to create randomly generated passwords handling encryption and decryption using RbNaCl::Libsodium.
- Tech stack: Ruby, Bundler, RbNaCl::Libsodium.

GitHub: <https://github.com/rdavid1099/passr>
