

Summary

I am a full-stack web developer who graduated from the Turing School of Software and Design in January of 2017. I cut my teeth on Ruby, Rails and back-end fundamentals, learning database management and performance optimization from some of the best and brightest in the industry. Since graduating, I have been working as a front-end engineer for Dish's core sales application, creating tools for thousands of direct and indirect agents across the nation using Angular.

Projects

Passr (Ruby Gem) - <https://rubygems.org/gems/passr>

A simple gem handling password generation, encryption and decryption.

- I created this open-source, lightweight gem to create randomly generated passwords handling encryption and decryption using RbNaCl::Libsodium.
- Tech stack: Ruby, Bundler, RbNaCl::Libsodium.

GitHub: <https://github.com/rdavid1099/passr>

Atlas-CLI (Shell script CLI)

CLI developed for the Learning Technology Team at Dish Network

- Built entirely with bash scripting language, the CLI generates several, customizable file structures and stores metadata to handle code generation and wiring with simple terminal commands.
- Tech stack: Bash scripting language, bats testing suite

Tutorial on what I learned: <https://github.com/rdavid1099/shell-cli-tutorial>

Employment

Dish Network - Full-Stack Web Developer May 2017 to Current
Denver, CO.
